Simplified prospectus of the sub-fund

LUXEMBOURG INVESTMENT FUND – U.S. Equity Plus

This simplified prospectus contains key information about the "LUXEMBOURG INVESTMENT FUND – U.S. Equity Plus" (the "Sub-Fund"), a sub-fund of the LUXEMBOURG INVESTMENT FUND (the "Company") a "multiple subfund" company incorporated on August 26, 2002. Should you need any further information before you invest, please consult the full prospectus of the Company. Within this full prospectus, the rights and duties of the investors are fully described. The full prospectus as well as the financial reports may be obtained free of charge at the registered office of the Company, of the Central Administration (see also "Local Agents"). For details about the Sub-Fund's holdings, please see the Company's most recent audited annual report or un-audited semi-annual report.

Investment objective and Investment policy

The objective of the Sub-fund is to provide investors with an opportunity to invest mainly in transferable securities listed or quoted in the United States of America and to provide a consistent performance in order to achieve a regular capital appreciation while giving ultimate consideration to capital security and portfolio liquidity. The Sub-fund's assets are invested according to the principle of risk diversification in equity securities listed on the New York Stock Exchange or on the NASDAQ and/ or in US government securities (T Bills).

The Sub-fund may hold liquidities on an ancillary basis (which may include on an ancillary basis units of US money market mutual funds providing daily liquidity). The part of the assets invested in units or shares of other collective investment undertakings may never exceed 10% of the sub-fund's net assets.

The Sub-fund may enter into transactions relating to options on financial instruments for a purpose of efficient portfolio management in compliance with what is provided under "Financial Techniques and Instruments" of the full prospectus and in the interest of an orderly management of its assets. Due to their high volatility, options are exposed to greater risks than direct investments in securities.
